

Competence thanks to our experience

More than 20 years of experience make us an ideal partner. The product design is a result of extensive dialogue with our customers. It is now being applied in the tens of thousands in screen-protection applications.

Quality to cater for intensive use

High standards of manufacture guarantee trouble-free usage by passengers, and safe functioning of the blinds. Safe and lasting functionality even under intensive use.

Products manufactured to meet specific design requirements

STOROrail is not only very durable, but the shape, colours and materials of each series can be adapted to the particular requirements of the wagon manufacturer. Hence the design of the wagon interior can be enhanced by the choice of materials and colours for the roller blinds.

STOROrail

Unitised construction

- Please send your detailed measures to enable us to enter them in our technical drawing.

Type of blinds:

- Dazzle-free fabrics
